one even teaspoonful of each, and add one cup of cream or milk. When the pie is nearly done, put a funnel in the center opening, and pour in as much of the sauce as the pie will hold. When the pie is done, let it stand for ten minutes longer, if there is any sauce left over, serve with the pie. (Mrs. Estelle Lemke in a New York Press.)

NEW SICKETS.
A Number of Unique and Novel Designs in Trimmings.
It seems to me that little has been made by writers of the new sickets seen at the openings and yet they are very different from any heretofore exhibited, being cut and trimmed in decidedly novel fashion. Nowadays milady does not content herself with the sicket made by the seamstress; it must be finished with the same care for details as the fashionable modiste to the toilette. That sickets are to be trimmed, be it

Orange Souffle.
Two sweet oranges, juice and pulp, half a teaspoonful of orange extract, two eggs or three small eggs, beaten separately, three heaping tablespoonfuls of powdered sugar, one teaspoonful of oil of almond, one level teaspoonful of baking powder, one level teaspoonful of starch, gradually mix the whites of the eggs, using a Dover egg beater. Into the well-beaten yolks beat one tablespoonful of sugar and half a teaspoonful of orange extract, and add the whites. Put the two tablespoonfuls of butter in the butter pan, rubbing the sides thoroughly. Reserve one-third of the white of egg and put the rest in the pan, then spread the mixture in the pan, then set over hot water; cover closely and cook 10 or 15 minutes. Do not uncover. When the water dries out of the pan, add a couple of water, when the mixture is set sprinkle the orange pulp over the top with a spoon and put the rest of the beaten whites around the edge as a border. When it is set, let it sit for a few minutes, then run a knife around the edge and pour out the orange pulp and pour the rest of the whites in, in which the cream has been stirred. Serve from dish or turn out on a platter. (Chicago Record.)

To Remove Ink Stains.
To remove ink stains from white cloth, peroxide of hydrogen should be poured over the spot, and then rinsed out with water. Fresh, new milk will often remove the stain. When the milk is applied, let it stand for a few minutes, then wash it out with water. (Chicago Record.)

How to Roast Geese.
Geese are generally in prime condition at this season of the year, and if young and fat, and properly stuffed with rice and apples, and roasted in a hot oven, they are a most delicious and healthy food. To roast a goose, first wash it thoroughly, and then stuff it with rice and apples. Then roast it in a hot oven for about four or five hours. (Chicago Record.)

CONDITION OF THE TOM BOY.

The Owners Are Satisfied With the Present Outlook.

Since the discharge of a large portion of the working force of the Tom Boy mine, two weeks ago, many and various rumors have been in circulation in regard to the condition of the property. The resident stockholders of the company have been reticent regarding the situation, but recent arrivals from Telluride give what is a reasonable explanation of the situation. When the Exploration company took the property an exploration was ordered of a portion of the ground, which the former owners of the mine did not think was valuable. The ground was thoroughly explored, however, and the result was the discovery of a great ore body which is certain in the future of the mine as the tapping will open up a large reserve of ore.

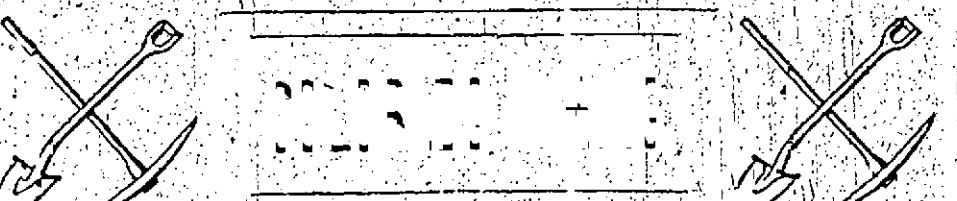

Orphan Belle Suit.

A suit was filed in the district court Tuesday entitled M. S. Ruffled and Sister Johnson vs. T. S. Hunter, J. E. Hunter, D. J. Miller and the Orphan Belle Mining and Milling company. The suit is for the removal of J. E. Hunter as treasurer and for the transfer of 300,000 shares of stock for J. E. Hunter to T. S. Hunter. It is the outcome of the recent action of the Orphan Belle trustees on Bull Hill, an account of which was published in the Gazette several months ago.

It seems that a number of the stockholders of the mine, who are now in the hands of the trustees, have been conducted by the present officers. The transfer of 300,000 shares of stock from J. E. Hunter to T. S. Hunter is alleged to be a fraud, and the courts will be asked to pass upon it.

No Dividend This Month.

The Tom Boy company is beginning a system of extensive development work, and it is confident that within a short time some well known leads may be tapped giving new stopping ground. The indications for enlarged ore bodies in both the upper and lower workings are good, but a good deal of development work is necessary to open them up. The mill will continue the treatment of ore now on hand. It is but a question of a few short time until the great prospects will be in full operation again, says the Telluride Examiner.

DEBAGO.

P. T. Trascher & Co. are now getting out ore from the Small Hope quite fast and will probably ship at least a car a week of 5000 ore.

The ore from the Little Hope mine is being shipped to the S. I. Thompson and they intend to ship at least 10 cars by the first of January.

The mining operations at the Columbus are under the charge of Mr. Thompson. A well known mining man from Colorado, who has been working in the territory, has been sent to the mine to look after the operations. The shaft will be sunk and the development of this great property will be pushed as fast as possible. More ore will be taken out in the near future but no effort will be made to take any ore from the stopes until next season, at which time the mine will be in shape to produce a large quantity of high grade ore.

S. I. Thompson, while at Ophir, visited a group of claims which he considered the best thing in a mining way in the state of Colorado. The group consisted of 15 claims, 10 of which are in the village of Ophir, the ground being owned by the Thompsons for years. The claims are located along the edge of a gulch where the rock is in the shape of an immense porphyry dyke, and no other where rock is picked up and yield gold, surface and in the rock making a fine showing. All the claims are in the same formation, the same rock, the same ore, and the same conditions. The Thompsons are now working on the claims, and the ore is being shipped to the S. I. Thompson and they intend to ship at least 10 cars by the first of January.

The Thompsons are now working on the claims, and the ore is being shipped to the S. I. Thompson and they intend to ship at least 10 cars by the first of January.

NOTICE OF FINAL SETTLEMENT.

In the matter of the estate of E. W. Francis, deceased.

Notice is hereby given that on Monday, the 22nd day of November, A. D. 1897, being one of the regular days of the November term of the County Court of El Paso county, in the state of Colorado, I, John H. Sherman, administrator of said estate, will appear before the judge of said court, to present my final settlement as such administrator, and will then apply to be discharged as such administrator. At which time and place any person in interest may appear and present objections to the same if any there be.

Dated at Colorado Springs, Colorado, October 11, 1897.

John H. Sherman, Administrator of the Estate of E. W. Francis, deceased.
